Standard Cylinder Price List

Victor Hydraulics Ltd
12 Klondyke Drive
Christchurch
www.victor.co.nz
info@victor.co.nz

Definitions

Standard Cylinders

Victor Hydraulic Cylinders design and manufacture a wide variety of custom hydraulic cylinders. Our standard cylinder range is intended to provide a rapid delivery of a basic standardised cylinder.

Should your requirements include special mounting, porting or control features, stroke lengths not listed in the tables, or have volume production requirements, please contact our sales team to request a solution specific to your technical or commercial requirements.

Ex-Stock

Cylinders highlighted as Ex-stock in the tables above are generally available for same day shipping. Cylinders ordered before 2pm will be dispatched that day. In the rare event of a stock out we will notify you as soon as we have received and attempted to process your order and make arrangements to expedite stock replenishment and dispatch.

Made to Order

Unhighlighted cylinder sizes indicated in the tables above with a price are not stocked but are made to order.

Log Splitter Rams

These cylinder sizes are commonly used for log splitter applications. They feature a large rod/bore diameter ratio which improves retract speed between splitting cycles. They are otherwise of identical construction to our standard Compact S range.

Cylinder Dimensions

Dimensional details for the standard range of cylinders can be found in our catalogue.

Refer to https://www.victor.co.nz/products/standard-cylinders

Terms of Sale

The following terms of sale apply to our Standard Cylinder Range

- All pricing noted above is ex-works, exclusive of GST, packaging and freight.
- Victor Standard Terms and Conditions of Sale apply to all standard cylinder sales.
- Pricing is subject to change without notice – for latest pricing, refer to www.victor.co.nz/products/standard-cylinders
